

Quick Reference to MA-C Curriculum

The nurse *shall not* delegate to MA-C any of the following acts:

- a) Conversion or calculation of drug dosage
- b) Assessment of client need for or response to medication
- c) Nursing judgment regarding the administration of PRN medications
- d) Medications to be given via parenteral routes and nasogastric, gastrostomy or jejunostomy routes

Medication Fundamentals

Safety and Rights of Medication Administration:

Three safety checks
Six rights of medication administration

Mathematics, Weights and Measures

MA-C does not convert medications dosages
Systems of measurement

Forms of Medication:

Liquid
Solid and semi-solid

Medication Basics:

Terminology
Abbreviations
Dosage range
Actions
Implications for administration
Therapeutic effects
Side effects
Precautions

Contraindications
Allergic reactions
Adverse reactions
Tolerance
Interactions
Additive or antagonist effect
Idiosyncratic effect
Paradoxical effect

Medication Orders, Documentation, Storage and Disposal:

Medication prescription/order
Medication documentation system
Medication storage
Disposal of outdated, contaminated or unused medication

Preparation and Actual Medication Administration:

Wash hands before
Review medications that require checking of pulse or blood pressure before administering
Identify the client
Introduce yourself
Glove if necessary
Position the client
Explain what you are going to do
Do what you explained
Wash hands after
Special considerations
Document

Safety

Prevention of Medication Errors:

What to know before administering medications

Causes and Reporting of Medication Errors:

Failure to follow prescriber's orders
Failure to follow manufacture's directions
Failure to follow accepted standards
Failure to listen to client or family
Follow policy to notify care providers
Complete a medication error report

Communication and Documentation

Building Relationships:

Review the communication process
Review barriers to effective listening and communications
Setting boundaries
Review team building

Reporting of Symptoms or Side Effects:

Observe, monitor, and report any
oditio
on o
i has much in n21.1forma(tio)-4n21.1(as in)-1290

Report Any Change from the Client's

Normal Condition:

Temperature
Pulse
Respirations
Blood pressure
Other changes in condition

Documentation of Medication Administration:

Identifying initials and time on medication administration record (MAR)
Circle and document the reasons that a client may not take a medication
PRN medication, delegated by the licensed nurse, per facility/agency policy

Role of the Delegating/Supervising Nurse:

Nurse determines level of supervision, monitoring and accessibility to be provided for nursing assistive personnel.
Nurse continues to have responsibility for the overall nursing care.
To delegate effectively, nurses need to be able to rely on nursing assistive personnel's credentials and job descriptions.
Nursing administration has the responsibility for validating credentials and qualifications of employees.
Both nurse and MA-C need the appropriate interpersonal and communication skills, and organizational support.
Trust is central to the working relationship.

Medication Administration			
Routes of Administration: Oral Buccal Sublingual Inhaler (metered dose) Nebulizer Nasal Eye (ophthalmic) Ear (otic) Topical Dressings Soaks Transdermal (e.g., patch) Suppositories (rectal and vaginal)	Factors Affecting How the Body Uses Medication: Age Size Family Traits Diet Disease Psychological issues Gender and basic metabolic rate Dosage	Classes of Medications Related to Body Systems and Common Actions: Antimicrobials Cardiovascular Dermatological Endocrine Gastrointestinal Musculoskeletal Neurological Nutrients/vitamins/minerals Respiratory Sensory Urinary	Location of Resources and References: Nurse Pharmacist Physician Package/drug insert Drug reference manuals

Ethical and Legal Issues

Role of MA-C Task is a delegated nursing function under nursing supervision. The following acts <i>shall not</i> be delegated to MA-Cs: 1. Conversion or calculation of medication dosage; 2. Assessment of client need for or response to medication; 3. Nursing judgment regarding the administration of PRN; 4. Medications to be given via parenteral routes and through nasogastric, gastrostomy or jejunostomy routes.	May perform a task involving administration of medications if: 1. The MA-C's assignment is to administer medications under the supervision of a licensed nurse in accordance with provisions of this act and rules; and 2. The delegation is not prohibited.	<i>Shall not</i> perform a task involving the administration of medication if: 1. The medication administration requires an assessment of the client's need for medication, a calculation of the dosage of the medication or the conversion of the dosage; 2. The supervising nurse is unavailable to monitor the progress of the client and the effect on the client of the medication; or 3. The client is not stable or has changing needs. If there is an error in the administration of medication, follow facility policy and procedure to report. Follow medication administration policies
---	--	---

Responsibility of MA-C When Accepting Delegated Tasks: Not to accept a delegation that is beyond MA-Cs knowledge and skills. Delegation is client specific. Task cannot be re-delegated by MA-C.
